## DETAILED ACTION

### ***Information Disclosure Statement***

The information disclosure statement filed October 1, 2007 has been placed in the application file and the information referred to therein has been considered as to the merits.

### ***Allowable Subject Matter***

Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for managing virtual private network communications. Each of the independent claims identify the uniquely distinct features of "receiving a communication from a local client, which is redirected on behalf of the local client by a proxy that the local client is unaware of and the communication is being directed by the local client to a remote client over an insecure network, and wherein the proxy determines on behalf of the local client that communication is to be associated with a VPN; inspecting a local cache to determine when the communication can be satisfied via the local cache; translating the communication for delivery within the VPN when the communication is not satisfied from the local cache; and sending, when the communication is not satisfied from the local cache, the translated communication via the VPN to a remote transparent VPN service, which manages VPN traffic for the remote client". The closest prior art, Liu (US 6,079,020), discloses a method for

managing a virtual private network fails to anticipate or render the above underlined limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
